PROJECTS

Travel Itinerary App (05/2023 - 05/2023)

- Built using React front-end framework and provides a user-friendly interface for managing itineraries, allowing users to easily add itinerary items, all in a visually pleasing and intuitive way.
- Live Demo: <https://roshith-travel.netlify.app>

Chat App (04/2023 - 04/2023)

- This is a ReactJS web application that integrates Firebase as the backend and Firestore as the real-time database. It offers a chat room for all Google-authenticated users, providing a seamless communication platform.
- Live Demo: <https://roshith-chat.web.app>

My Spotify Playlist Web App (03/2023 - 04/2023)

- Responsive website created with ReactJS which uses Spotify API to get a playlist and list the songs in it.
- Live Demo: <https://hear-my-10-73ea9.web.app>

Plant Disease Detection Using AI (06/2021 - 05/2022)

- An academic project to detect diseases in plants using machine learning. The app provides cure and connect user with nearby plant health department. This is a cross platform mobile app built on React native and Django.

WORK EXPERIENCE

Freelance Designer

Fiverr

09/2020 - 11/2022
